

# Innov8 Cabin Solutions

## Overview

### Did You Know that...

- Falcon, Gulfstream, Challenger, Global Express, Hawkers delivered starting in the early '90s to ~ 2010 have CMS systems that cannot support new technology personal electronic devices (PED)s for viewing, charging etc. without complete retrofit using OEM systems.
- Many of these target platforms hull values have dropped to a point where upgrade cost is their primary concern.
- These aging cabins have Audio International, PacSys, and C-Series systems and are prime targets for a low cost solution that affords a step forward to PED functionality and a low cost path to integrating PEDs, smart UHD monitors and an affordable CMS.

### Innov8 Cabin Evolution Benefits:

- At a fraction of the price of current OEM systems
- Installation is easy, fast and fits within a typical C check schedule
- A weight reduction of approximately 10Lbs on a typical installation

### Questions:

How can I step my way toward an affordable/new technology CMS system?

What is available to enable me to charge/use my PED/content?

## Affordable and system-independent cabin electronics upgrades for aging aircraft

**As a leader in cabin upgrade solutions StandardAero, in collaboration with Innov8, provides an affordable electronic solution that can upgrade aging CMS systems with minimum downtime.**

### How it Works

- StandardAero will listen to understand your specific requirements and budget
- Innov8 will collaborate with StandardAero to provide optional packages to address exactly what you're trying to accomplish
- Depending on the selected solution, StandardAero will fit the installation into your schedule, whether with a maintenance event or, possibly conduct the installation in your location depending on the solution chosen.

### Benefits

- Affordable products that enable you to use your everyday personal electronic devices (Android, Apple, etc.) on the aircraft
- Replaces antiquated monitors with smart UHD monitors, enables device charging, replaces failing cabin controllers
- Removes weight while streamlining/updating the look and feel of the cabin electronics
- Easy, fast and affordable installations.
