- ▣ Prototype and Production Kitting
- ▣ Material qualification

Big Experience through Personal Service

Imagine complete and personalized service from an experienced certification professional who is focused on your program and working with you to achieve success. Let StandardAero's ODA put our experience to work for you.

Whether you are looking to purchase one of our many existing STCs or need complete management of a developmental STC project, StandardAero's Certification Services group has the proven experience you need. We are approved for numerous types of modifications on over 200 models of aircraft and can normally begin your project immediately. StandardAero will protect your interests and limit the risk.

Whether you operate a single engine aircraft or the largest transport category aircraft we have you covered. StandardAero will be there to support your certification needs long after the STC is signed.

TO FIND OUT MORE about our Certification Services, contact your area representative or visit: <http://www.standardaero.com/CustomSolutions/CertificationServices.aspx>

Benefits of StandardAero's ODA Capabilities:

- ▣ **Minimal FAA involvement**
After delegation, StandardAero is in control of the certification schedule.
- ▣ **Decreased downtime**
We take a project focused approach that works to your schedule requirements.
- ▣ **Personalized project management**
A Certification Engineer is assigned to manage each project.
- ▣ **Tailored approach**
We offer any combination of management, engineering, certification, kitting, installation and marketing/sales that you may need.
- ▣ **Our reputation and experience**
StandardAero is known for our integrity, service, expertise, dedication and customer experience.
- ▣ **Committed to your success**
Our staff is dedicated to do whatever it takes to ensure the success of your project.
