A new way of flying

The world is embarking on a new era, where light jets have made the use of privately owned or chartered business aviation travel much more affordable and accessible to many.

As the first and only independent Pratt & Whitney Canada PW600 Designated Overhaul Facility (DOF), StandardAero is at the forefront of cutting-edge technology, backed by years of experience.

Building for the future

Operational efficiency is the key to success for light business jet operators. To help customers achieve this, StandardAero's state-of-the-art facility located in Maryville, TN, was built with a design philosophy that delivers turn times which will continuously meet or exceed your expectations.

On an OEM program? We've got you covered

As a Designated Overhaul Facility, StandardAero is authorized to service your PW600 engines even if they are part of a Pratt & Whitney Canada pay-by-the-hour program. You've got the protection of a maintenance program with choice in service. A winning combination!

Whether your engines require repair or overhaul, leave them to us, the experts. We will ensure that you receive the best quality products and service every time. StandardAero has the ability to offer additional benefits to our customers, including:

- In-house repair capabilities, eliminating the need for costly replacement parts
- Dedicated Field Service Teams available 24/7
- Full access to P&WC's rental engine bank
