

Engine Test Stand Sustainment

Our Customers' Challenge

At StandardAero, we've been a world leader in engine maintenance, repair and overhaul for over 40 years, and apply reliability analysis best practices to provide trouble free solutions to Government & Military customers. Our Test Stand Sustainment solutions contributes to test cell consistency and reliability, and improved procurement, maintenance and management of engine and gearbox testing. We know that these systems are used in a complex and demanding environment, and new maintenance solutions are needed to keep them working properly. With 24 unique test cells, and the experience that comes from performing over 2000 engine tests a year, we understand this challenge.

The Solution

Sustainment with ease. A one-stop-shop with a team of test cell experts to enable 100% of test stand repairs and modifications. One call to our Hotline provides a quick and effective solution for any test stand requirement. From test cell design, to our proactive maintenance optimization approaches and our deep knowledge on test stand sustainment, we can increase your Availability and Reliability, while also lowering your Operating Costs.

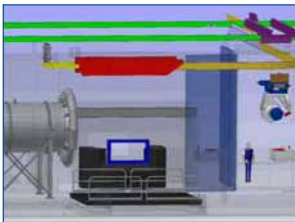

The Results

We put test cells to work. Our reliability-based tools have typically reduced total ownership costs and increased reliability by 20-30%, while improving availability and helping the customer better predict their logistics needs.

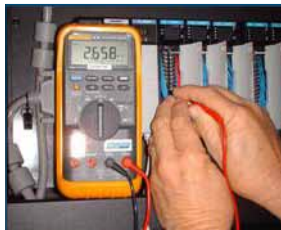

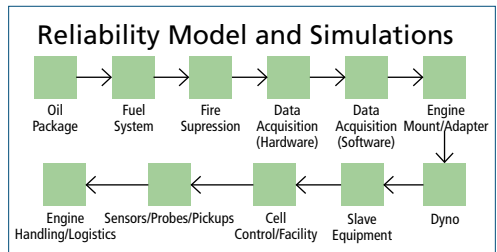

Why StandardAero?

StandardAero Engineering Services rapidly develops and delivers novel solutions to your maintenance problems. Contact us today, and let our engineers and technical specialists develop a customized solution to fit your needs.
