

YOUR READINESS IS OUR FIRST PRIORITY

Rolls-Royce T56/501-D

With over 50 years experience supporting the Rolls-Royce T56 family of engines, StandardAero has the most comprehensive C-130 and P-3 propulsion system overhaul and repair capability in the world. We have over 90% in-house repair capability, full test stand capability, and the most extensive repair technologies in the industry. Our redundant overhaul facilities, extensive component repair technologies, and large supply chain ensure best value solutions, operational flexibility, and on-time delivery. StandardAero's engineering expertise has resulted in market-leading performance and reliability enhancements, increasing time on wing by up to 20%.

StandardAero has the largest and most diverse group of T56 customers in the industry. StandardAero is the T56 engine depot for the US Air Force, US Navy, Canadian Forces, Royal Australian Air Force, Royal Netherlands Air Force, Swedish Defence Forces, and many other government and military customers around the world. We are responsible for the depot-level maintenance for 70% of the T56 engines worldwide.
