The Possibility

Imagine a world where your publications work for you; your team’s collective experience is captured and used to make your maintenance practices better; your manuals not only explain what to do but also show you how to do it; spend less time searching for data and more time fixing your aircraft; and technical training systems are customized to the individual technician.

The Reality

StandardAero’s **Enterprise e-Publications** service has “evolved” electronic manuals. What used to be digital versions of paper manuals are now interactive systems combining manuals with 3D integrated training and knowledge bases, all linked and customized to your needs.

Make Your Data Work For You

You have spent years gathering experience and data. With a StandardAero knowledge base integrated into an Enterprise e-Publications solution, your experience and historical maintenance practices are captured for quick and easy reference. Using information from the manuals you will be able to determine if an issue was previously encountered, and what was done about it. You can spend less time researching issues and more time making aircraft available.

Why StandardAero?

StandardAero provides customers with more efficient, cost effective aircraft and engine maintenance through the development of highly customized technical data integration and fleet optimization tools. These tools reduce maintenance costs, enhance performance, increase aircraft readiness, and add predictability to engine maintenance.
