

CABIN INTERIORS

StandardAero World-Class Cabin Interiors Capabilities

Our Customers' Challenge:

Discriminating Business Jet owners and operators need a trustworthy, capable interiors facility and team to provide cabin interiors services from minor repairs and re-upholstery to complete floor plan changes. Key requirements are design, materials selection and attention to the smallest detail.

The StandardAero Solution:

StandardAero has completed hundreds of high-quality cabin refurbishments, enhancements, floorplan modifications and upgrades. Our STC Organization Designation Authorization (ODA) enables us to certify our modifications on behalf of the FAA which saves our customers time and money.

Interiors Capabilities:

- **Interior Design** - Long before your aircraft arrives our interior designers work with you to develop an interior that meets your specifications. In addition to selecting leathers, carpets, fabrics, and veneers, we work with you to create an interior environment that satisfies your specific requirements.
- **Craftsmanship** - Our team of highly trained technicians deliver craftsmanship that is unparalleled in the industry. From custom built seat cushions to sewing, custom built cabinetry and the fit and finish of the final upholstery—we deliver on the promise of making your aircraft's interior comfortable, functional, and elegant.
- **Technology** - We have pioneered technology that protects your aircraft's interior enabling it to remain looking as-new for as long as possible. We utilize an ultraviolet curing process to enhance the finish on our woodwork. And our use of three-axis machining allows us to fabricate parts to tolerances within thousandths of an inch.
- **Details** - This meticulous attention to detail demonstrates our commitment to deliver an interior that sets the industry standard for excellence.
- **Special projects** - We specialize in floor plan changes, custom-designed and highly-functional cabinetry, installations of complex cabin management and entertainment systems and communication equipment. Our exemption to install a mid-cabin pocket door in place of a drape in the Falcon 900 sets us apart.
