

AVIONICS UPGRADE

Pro Line 21™ Integrated Display Systems For Falcon 50

Overview

Upgrading a Falcon 50 with Pro Line 21™ IDS provides significant value to owners, operators and pilots by enabling increased aircraft value, improved safety, increased reliability, reduced weight and lower cost of ownership. Pro Line 21 provides the latest technology along with the best value retrofit display system solution available, and you can add functionality as your needs evolve.

Your Benefits:

- **Improved Safety:**
 - o **Electronic Charts & Map Overlays**
 - Increased situational awareness
 - Reduced pilot workload
 - o **XM® Graphical Weather**
 - Digital display with timely and specific information
 - o **Crystal clear LCD displays**
 - Easy-to-read graphical interface
- **Reduced Cost of Ownership**
 - o State-of-the-art functionality
 - o Superior option capabilities
 - o Scalable solution set
 - o Integrates advanced graphics with existing sensors, radios, flight management systems and autopilots
- **Growth Path**
 - o A Roadmap to Future Capabilities [CNS/ATM]
 - o Long-term Solution

Avionics Upgrade Information:
