

Fastlane™ TFE731 CZI in 14 Days!

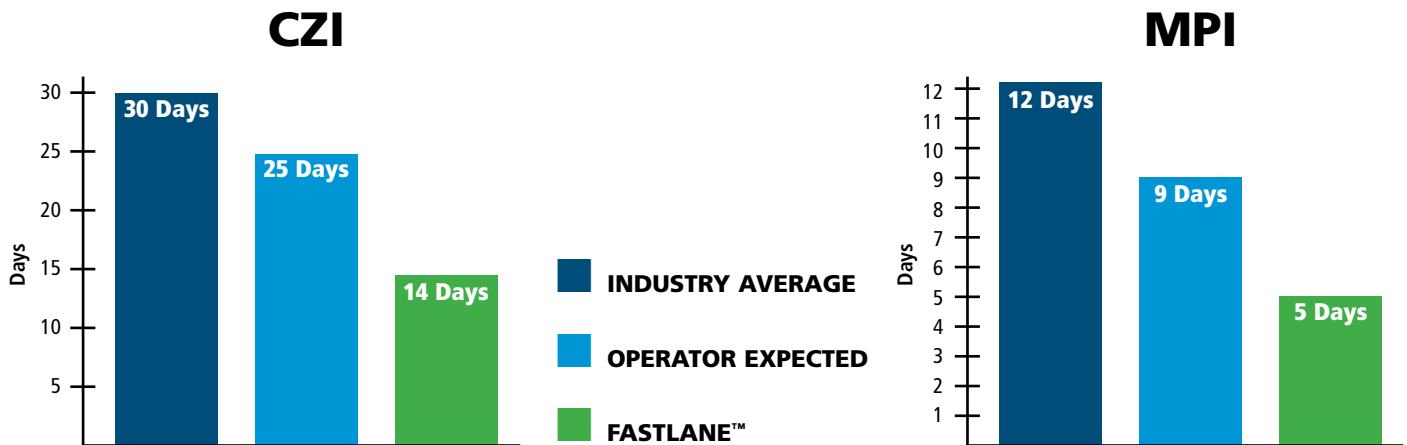

Fastlane™ - Setting a new standard in MRO cost savings

284 MRO customers with TFE731 engines in their fleet stated in a recent study that average turn times for Core Zone Inspections (CZI) and Major Periodic Inspections (MPI) exceed their expected turn around times. If you are like most business aviation operators you need to reduce your cost without impacting operational performance. By taking advantage of StandardAero's faster turn around times, operators have reported savings up to \$50K on their operating budget. And we're meeting these fast schedules with the same best in class quality, precision and service that you've come to expect from us.

We Broke The Code On CZI & MPI Turn Around Times...

By optimizing workflow, investing in equipment and critical parts we have reduced our turn around time for CZI and MPI not just below the industry average, but beyond operators' expectations.

...So You Don't Break Your Budget.

This speed means lower costs for you. From a combination of additional lease revenue earned, replacement rentals saved and the efficiencies of getting the service completed in a single visit, CZI customers have reported savings of up to \$50K on their operating budgets.

The TFE731 Gurus.

StandardAero has a unique expertise in Honeywell engines from our legacy as Garrett Aviation. We're using this experience and our innovation to set a new standard for TFE731 maintenance – for speed, precision and the benefit of your pocketbook.
