

Hamilton Sundstrand

54H60 Propellers

The New Standard In Hamilton Sundstrand 54H60 Propeller Support

At StandardAero, we retain simple core values that set us apart from the other aviation repair centers – we put our customers first, and focus on what is important to them and their business.

Servicing Your Propeller:

- Disassembly, Cleaning and Inspection
- Non-Destructive Testing
- Parts Restoration, including:
 - Machining and cold rolling
 - Anodizing and plating
 - Spinner and Control assembly (including valve/pump housings)
- Balancing and calibration
- Independent testing of valves and pump housing
- Painting
- Blade shank and taper bore machining

StandardAero will reduce your maintenance costs – StandardAero’s repair philosophy with the Hamilton Sundstrand propellers has always been “repair rather than replace.” Our dedicated engineering group is continually developing repairs that are aimed towards reducing the direct operating costs of your propeller and increasing the mean time between your removals.

We provide unparalleled customer support and field service – StandardAero’s customer service team is available 24 hours a day, 7 days a week to provide you with immediate assistance. Our field service representatives are highly trained and skilled and can provide you with on-site troubleshooting and emergency support.

We guarantee an enhanced turnaround and throughput time – StandardAero uses a “Continuous Improvement” philosophy to enhance productivity, throughput and to repatriate rework processes. To reduce turn-time and minimize subcontract activity, we perform 99% of the OEM repair processes in-house. All of our repairs are done in accordance with StandardAero’s own proprietary repair processes.

Whether your propellers need repair or overhaul, leave them to us, the experts. We will ensure that you receive the best quality products and service every time.
