

Brisbane Facility

An Industry-Leading MRO Facility

StandardAero's Brisbane, QLD, location is Australia's only Pratt & Whitney Canada PT6A Designated Overhaul Facility (DOF). Formally opened in 2013, the Brisbane facility offers OEM-authorized support for over 50 variants of the PT6A turboprop family, supported by an on-site test cell, in-house component repair capabilities, and extensive field service coverage.

Supporting the Asia-Pacific Region

As a P&WC authorized PT6A DOF, StandardAero's Brisbane location provides operators with the highest levels of support. Thanks to our extensive in-house component repair capabilities, we are also able to provide customers with a range of cost-effective MRO solutions, utilizing used serviceable materials and a 'repair rather than replace' philosophy. In addition, the Brisbane shop provides field service and engine repairs on the JT15D, PT6T, PW100 and PW300 engines, including on-site repairs at customer locations as well as responsive aircraft on ground (AOG) support.

StandardAero — The Right Choice

StandardAero's Brisbane facility holds a wide range of approvals, including CASA Part 145, EASA Part 145, FAA Part 145, ISO 9001:2008 and AS9110A. The facility also holds approvals from numerous local civil aviation authorities from across the Asia-Pacific region, including China, India, Indonesia and Thailand. No matter where you're located, we're the right choice to keep you flying!
