

GE Aerospace CF34-3 & -8

Custom Solutions, One-Stop Service

StandardAero has been providing full maintenance, repair and overhaul (MRO) support to operators of CF34-powered aircraft since 2001. Being one of the industry's largest independent engine MRO providers, we have the freedom and capability to custom-design a maintenance solution to best suit your operational requirements.

Bringing You the Best of Both Worlds

As the world's first independent MRO specialist to hold CF34 Authorized Service Provider (ASP) status, our 20+ years of reliable experience on the CF34 and our strong relationship with the OEM gives our customers the peace of mind that their engines are in the right hands. Our GE-authorized repair and technical licenses ensure that our customers receive the highest levels of delivery quality and support.

As an independent company, we also exercise the ability to perform customized worksopes, giving you the flexibility to proactively manage your operations. And our extensive in-house component repair capabilities ensure that we are able to minimize your costs while delivering high-quality engine worksopes with industry-leading turn-around times.

Dedicated Field Service Teams Available 24/7

Unlike most MRO providers, StandardAero doesn't pull technicians from the shop floor to assist your AOG event. We have dedicated Field Service Teams who are trained, equipped and authorized to provide troubleshooting and emergency maintenance services 24-hours a day, seven days a week, anywhere in the world. If you can't come to us, we will come to you!

For AOG situations and emergency troubleshooting, please call us at:
